Hi Freelancers, I have a document that needs to be cleaned up. I need the full functionality of Microsoft Word. With an ability to Update the Title Page as needed, Utalizing Headings and formatting to do so. Also there are inconsistencies with the Subheadings and Indentions in the document. The hierarchy should be in Normal Numeral Format. I am giving you a sample of the document. the entire document runs about 120 pages but it is heavily spaced and most of the formatting is complete. There are 2 files the word and pdf, the pdf has some markups for what I expect. PROJECT 3315 - The entire interface set will be delivered in Figma. Most of it is in the PDF file. - The freelancer must do front and back-end development only - Please indicate the price and deadline for two different scenarios: 1) Web app 2) Web App + Android App + iOS App - What frameworks/technologies (Front and Back-end) do you recommend and intend to use in this case? We prefer Flutter, but we are open to suggestions. ...original. No taking from sketchfab or Unreal Marketplace or any other site where they give you free stuff and changing it. 100% your creation. I have created a page in my wordpress website using But I have to build 285 PAGES with the same image and text format. Right now I start with a blank canvas and use colibri to build the page. See attached PDF how it looks. But I do not know how to create a template for pages on wordpress. So that when I go to create a page, I can select from the template list and apply the attached layout. Can someone create a template in my wordpress so that I can select it from the list and it pre-populates my page when I create it to save time.
